Step 1 of 4: Selecting a Theme

Selecting a browser theme is important. Making your browser look the way you want it to look makes browsing way more pleasurable and convenient.

In this step:
1. Click on browser themes that you like,
2. See how your browser looks in them,
3. Click next when you are satisfied.

Alternatively you can enter the URL of a theme designed by a FirePig user and stored in the FirePig store.

Step 2 of 4: Selecting quick access tools and pages

Tool bar is browser functionality and web pages that are available with a single click. It is very important to make sure it has things you need every day.
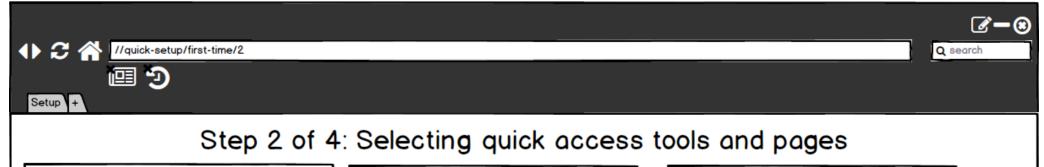

In this step you can:
1. Drag tool bar elements and drop them in your own tool bar where you want them to be.
2. Remove added elements.
3. Search for elements by name or type. E.g. write "visibility" to find all visibility-related functionality.
4. When you are done click "Next".

Click "Skip" if you currently have no need for such customisation.

Step 3 of 4: Setting up personalized bookmarks

Some bookmarks are more important than others. We offer bookmark customization so that you can use your bookmarks as efficiently as possible.
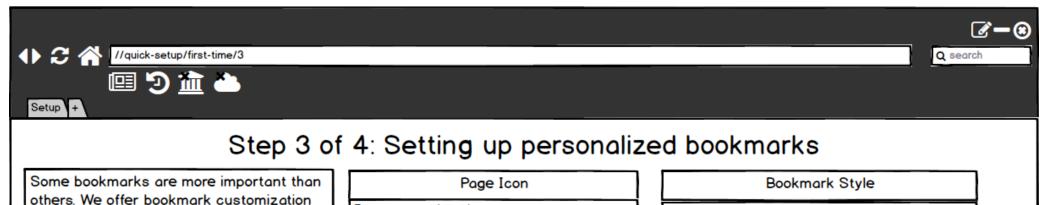

In this step you can:
1. Select a picture of a new bookmark.
2. Enter the URL link of the web page.
3. Check "With login" and enter login information if you have an account in a web page and want to be logged in automatically.
4. Select desired size and boarder size and type of the bookmark.

Final step: Comfirm settings

Congratulations on making progress personalizing your browser. Here you can check what choices you have made and alter them if you need to.

Here you can:
1. Change browser theme once again.
2. Remove Quick-Access elements.
3. Remove or edit customized bookmarks.

Click "Comfirm" to finish the setup process.
